

All-in-one controller for generator power plant in mains paralleling

MASTER COMPACT 1B is a controller of a complete range for energy sources and power plant management: generators, mains, PV/wind, batteries storage, tie breakers. This controller made to manage generator power plants from 1 to 32 generators in parallel with mains. MASTER COMPACT 1B is suitable for applications with 1 circuit-breaker (no breaker on bus). MASTER COMPACT 1B offers flexibility and time saving thanks to its simple wiring and easy programming.

#### Hardware display

The controller is available in both switchboard panel mounted version with display, or core base mounted version and compatible with i4Gen touchscreen color display range.

#### Software

The controller is configurable from its front panel display, from i4Gen HMI, or through the free i4Gen Suite software.

CORE BASE DIN RAIL MOUNTED VERSION

SWITCHBOARD MOUNTED VERSION WITH DISPLAY

#### Part numbers:

A56-MAS1B-00 Switchboard mounted version with display A56-MAS1B-10 Core base mounted version

# **KEY FEATURES**

#### Single line power plant overview

An interactive and adaptative single-line diagram is generated automatically from the configuration. It provides a global view of the power plant and the possibility to switch between controllers in one click.

#### Easy connection to controllers

Automatic detection of controllers on the Ethernet network for fast and easy connection.

## Ocompatibility with generator and grid controllers

Compability with PRIME, HYBRID, BAT and BTB controllers of the COMPACT range to manage complete hybrid power plants.

#### Guided experience

- Only parameters and measurements relevant to the user are accessible
- 2 operating modes available: standard and advanced, to suit the skill level of the user
- Built-in documentation in i4Gen
- Dynamic display of the mimic diagram and the control buttons.

#### Enchanced graphical display

Important information are displayed on easy-to-read graphical widgets: numerical values, bar graphs, gauges, curves, animated synchroscope....

#### User friendly equations programming

Easily program your own equations using the drag & drop Easyflex feature.

#### Remote access (optional)

- Supervise, configure and control your power plant from anywhere through a reliable and secured remote communication provided by Zoho Assist
- Receive E-mails from i4Gen when an event, an alarm or a fault is triggered.

# On-board modbus TCP client and server for integration with other devices

- Client (master): create custom frames in reception or transmission to read or write datas
- Server (slave): allow other devices to read/write the controller registers (with 300 registers available for custom mapping).

#### Automatic versions update

Automatic update of controller firmware and PC software versions.

## **OTHER FEATURES**

#### **Power control and management**

- Datas shared between the controllers through CANbus for optimised control of the power plant: load sharing, clock synchronization, generator start/stop, sharing of electrical measures...
- Mains failure detection and no break changeover.
- Optimized PID loop with exceptional performance for synchronization and active/reactive power control & Dynamic curves to make PID configuration easier.
- Synchronization management of frequency, phase, voltage and phase sequence (dynamic or static).
- Active/Reactive load sharing.
- Slave mode: for synchronization and load sharing management only.
- Generators base load control.
- Mains peak shaving when importing or exporting power.
- Load shedding management to ensure that priority loads are supplied in case of mains failure
- Unload breakers management according to available generators power and load demand.
- Automatic management of multiple mains (up to 32).
- Automatic or manual control of circuit breakers with malfunction alarms management.

 Management of complex power plants with multiple generators, grids, BESS, PV/wind systems, tie breakers (up to 40 of them in one power plant).

## **Displayed information**

- Alarms and events logging: Detailed history log with timestamps of the 500 last events, alarms and faults for easy and fast troubleshooting.
- Electrical measures supervision.
- Synchronization measures supervision.
- Inputs/Outputs status.

#### **Programming**

- Scheduler: Periodic or one-off execution of specific functions and modes can be scheduled.
- Alternative parameters values configurable and switchable using digital inputs or through modbus TCP.

#### **Options**

Phase offset for D/Y transformers.

All-in-one controller for generator power plant in mains paralleling

# **APPLICATION EXAMPLES**

#### MULTIPLE GENSETS PARALLELED WITH 1 MAINS BREAKER

# PRODUCTS REQUIRED

- **3 GENSYS COMPACT PRIME**
- 1 MASTER COMPACT 1B

#### **FEATURES**

- · Start/Stop control
- · Genset mechanical & electrical protections
- · Breakers management
- Synchronization
- · Generator load sharing
- · Mains paralleling and power management
- · Load shedding

#### A CONFIGURATION WITH BUS TIE BREAKER AND 1 MAINS BREAKER

# 4€ المتبتغ

2 MASTER COMPACT 1B + 1 BTB COMPACT

- · Start/Stop control
- · Genset mechanical & electrical protections
- · Breakers management
- Synchronization
- · Generator load sharing
- · Mains power management
- · Load shedding
- · Mains paralleling
- · Bus & Tie breaker management

# Name of the state of the state

#### PRODUCTS REQUIRED

- **2 GENSYS COMPACT PRIME**
- 1 MASTER COMPACT 1B
- 2 HYBRID COMPACT + 2 BAT COMPACT

- · Start/Stop control
- · Genset mechanical &
- electrical protections Breakers management
- Synchronization
- · Generator load sharing
- · Mains power management
- Load shedding
- Mains paralleling
- · Communication ModBus & Spec
- · Control PV/wind & battery inverter
- Control of the reactive power kVAR batteries & PV

# OMPLEX APPLICATION WITH MULTIPLE GENSETS, MAINS, BUS TIE BREAKERS

# PRODUCTS REQUIRED

PRODUCTS REQUIRED

**2 GENSYS COMPACT PRIME** 

- 5 GENSYS COMPACT PRIME
- 1 MASTER COMPACT + 1 MASTER COMPACT 1B +
  - 1 BTB COMPACT

# **FEATURES**

- Start/Stop control
- · Genset mechanical &
- electrical protections Breakers management
- Synchronization
- · Generator load sharing
- · Mains power management
- Load shedding
- Mains paralleling
- · Bus & Tie breaker management

# **WIRING DIAGRAM**

All-in-one controller for generator power plant in mains paralleling

# **SPECIFICATIONS**

ELECTRICAL SYSTEM	
Electrical system	Compatible with 3 or 4 wires three-phase, or two-
	phase or single phase systems
DC POWER SUPPLY	- 201/50
Power supply range	738 VDC
Maximum voltage	45 VDC during 15mn
Current consumption (at 24 VDC)	130 mA + the sum of maximum consumption of each digital ouput
AC VOLTAGE MEASUREMENT	
Mains measurement inputs	3ph + N (Neutral optional)
Power plant measurement inputs	3ph + N (Neutral optional)
Measurement range	80500VAC
Current consumption	100 mA max
Accuracy	1%
Frequency range	3575 Hz, 15VAC minimum between phase and neutral
AC CURRENT MEASUREMENT	
Mains measurement inputs	4 wires (3ph)
Power plant measurement inputs	2 wires (1ph)
Measurement range	05A; 1VA
Overload	Overload 15A during 10s
Accuracy	0.5%
INPUTS	
Digital inputs	9 : NO or NC to ground. Adjustable timer On and Off
Digital Ilipato	3. No of No to ground. Adjustable timer on and on
Digital inputs expansion	64 : via CANopen
	· · · · · · · · · · · · · · · · · · ·
