

## OBSOLETE PRODUCT SHEET

UNIGEN Plus ref: A51Z1

### I. Obsolete product

### II. Information

The reference A51Z1 UNIGEN Plus is now obsolete.

### III. Replacement product

The replacement product, for any order from today is:

- GENSYS Compact Prime in "synchronization and load sharing only" mode ref A56-PRIME-10 (core version) + start-up sequence inhibition mode, for paralleling between generators.
- GENSYS Compact Mains in " synchronization and load sharing only " mode ref A56-MAINS-10 (core version) + start sequence inhibition mode for paralleling a generator with the grid.

**Important** : the GENSYS COMPACT CANbus communication is not compatible with the UNIGEN plus CANbus communication. Furthermore, the GENSYS COMPACT does not have a parallel line to be connected to the CRE Technology **GCR** product.
